

Optimum Solutions for Crane Systems...

Hoisting Drive Units

V Series

5 different drive unit sizes up to 40 ton.

Type	Load	Classification
VR373.1K	3,2 ton	M7(4m)
VR473.1K	6,8 ton	M6(3m)
VR573.1K	12,5 ton	M5(2m)
VR673.1K	25 ton	M4(1Am)
VR773.1K	40 ton	M5(2m)

H Series

14 different drive unit sizes up to 150.000Nm.

- Electromagnetic brake can be mounted on housing of the drive unit up to 1600Nm.
- Supplied with base frame which eldro brake, motor and drive unit are combined with.
- Different shaft and flange arrangements are offered on request.

Travel Drive Units

D Series

10 different drive unit sizes up to 160kW.

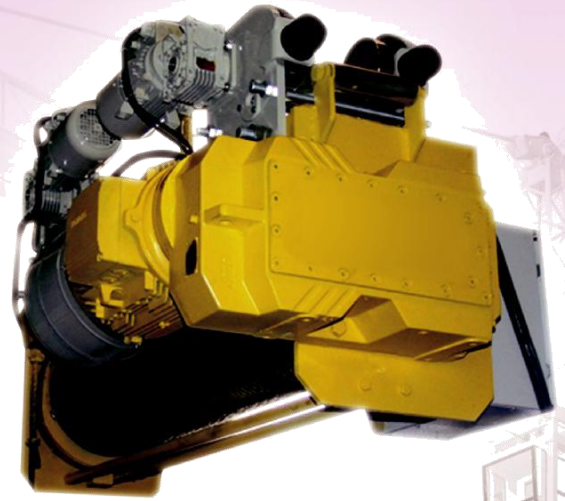

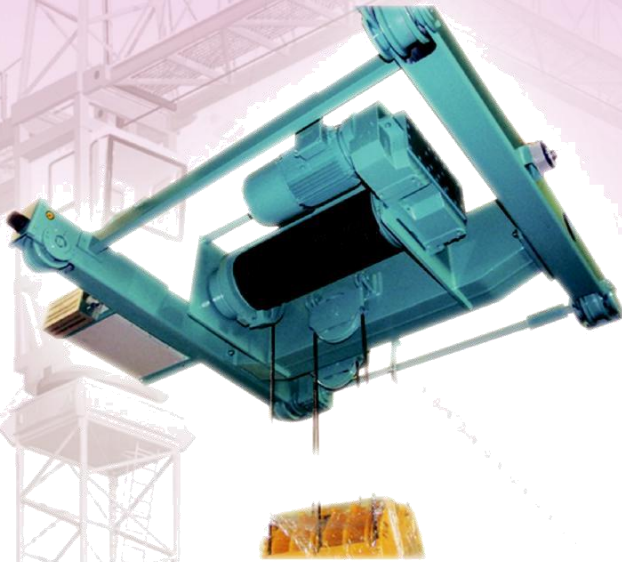

- Supplied with electromagnetic brake and encoder with mounted in the back of the motor.
- Range of output options are available such as solid output shaft, hollow shaft, splined solid and hollow shaft according to DIN5480.
- Different output flange dimension options.

K Series

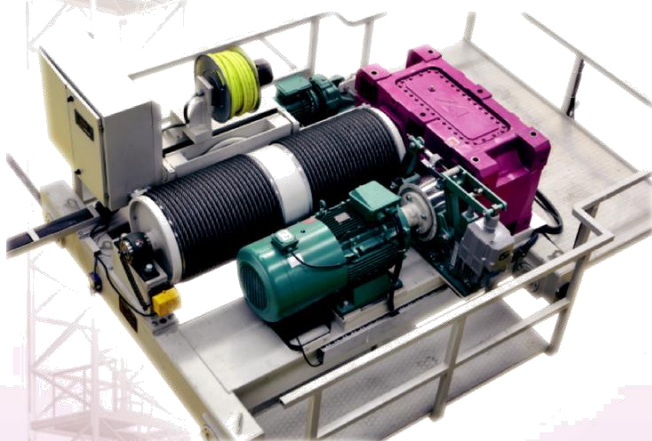

7 different drive unit sizes up to 90kW.

- Supplied with electromagnetic brake and encoder with mounted in the back of the motor.
- Wide range of output shaft options are available on request such as solid shaft, hollow shaft and splined solid or hollow shaft according to DIN5480.
